DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group I (claims 1-55) in the reply filed on 11/22/05 is acknowledged.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, drawn to memory, classified in class 257, subclass 296.
- II. Claims 36-55, drawn to an electronic system, classified in class 365, subclass 145.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions invention I does not use the data values.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
